

## **Community Engagement Report**

**December 2020**

December was a short work month with a quick increase in the number of positive COVID-19 cases in Adair County and the surrounding community. As they continued to remain high, the Community Learning Center (CLC) remained closed to help ensure the safety of all. During December the CLC continued to offer classes and activities virtually in addition to interactive videos, resources, and information through our Facebook page. Collaborations with three TSU capstone projects finished and the Community Mentor Project with ATSU-KCOM moved forward with the Standardized Patient portion of their grant and training program.

Christmas cards were sent from the CLC to more than 50 people who regularly use services at the Center throughout the year in hopes of keeping them connected with their friends and supports outside of their homes.

Finally, the CLC has remained in contact with people through the monthly email, phone calls, Zoom meetings, and Christmas cards.
